

'WE GIVE LIFE TO PLASTIC.'

Company Profile and Mission:

We are an industrial packaging manufacturer operating in Kahramankazan, Ankara, using experienced, cutting-edge machinery. Our company's core mission is to prioritize environmental and global sustainability in our production, guided by the motto "We Bring Plastic to Life." We reintroduce recyclable materials as raw materials to our national economy in many areas. We strive to use certified raw materials that are harmless to human health and the environment in our production processes.

What we produce:

Hima Ambalaj offers a wide range of products to meet a wide range of industrial packaging needs.

Aluminum Profile Wrapping Tape: At Hima Ambalaj, we best meet the needs of the industry with our high-quality and durable wrapping tape solutions, including printed, unprinted, original, and intermediate quality.

Warning Tape: We produce custom-printed and general-use warning tapes.

Edge Protector: The primary purpose of using these protective materials is to protect the packaged product from external factors until it reaches the destination. Available in five different colors, we manufacture in kraft, moisture-resistant, adhesive, and round wrapping formats.

Shrink Wrap: It is a packaging material used especially for packaging products and securing pallets, shrinking when heat is applied to form a tight protective layer.

Pallet Cover: A pallet cover is a practical packaging solution that allows you to keep your products safe by protecting them from dust, moisture and external factors during transportation and storage.

Mulch Nylon: Mulch nylon is a material used in agriculture for weed control, soil moisture preservation and protection of plant roots from temperature changes.

Bubble Wrap: Used to protect sensitive products against impacts, scratches and external factors.

Nylon Tarpaulin: Under-concrete nylon is a critical insulation material that extends the life of the structure by preventing the concrete from being affected by moisture and harmful chemicals in the soil in foundation and floor applications.

Stretch Film: It is a packaging material with flexible and adhesive properties, used to keep your products together during storage and transportation and to protect them from dust and moisture.
